 Friday, December 5th from 4:00-6:00PM or  
 Saturday, December 6th from 10:00-1:00

\*About our Poinsettias  
 \*All of the Poinsettias are pinched in order to create a much fuller plant.  
 \*Each plant includes a pot cover for added decoration and to prevent water leakage.  
 \*Placing your poinsettia in a cool room 55 to 60°F at night will extend blooming time.  
 \*High temperatures will shorten the life of the colorful bracts.  
 \*The plants are packed in a protective sleeve for easy transportation and to avoid damage to the plant.

**\*Poinsettia Care**

\*Place the poinsettia in a sunny window.  
 \*Do not let any part of plant touch cold window panes.  
 \*Indoor temperatures from 60 to 70°F is ideal for long plant life.  
 \*Indoor temperatures from 60 to 70°F is ideal for long plant life.
